

THE GLEICHEN CALL

VOLUME 44 NO. 6

Authorized as second class mail,
Post Office Department, Ottawa.

GLEICHEN, ALBERTA, WEDNESDAY APRIL 25, 1951

SUBSCRIPTION, \$2.00 PER YEAR

Plebsite Soon For \$1.00 a Day Hospitalization

A plebsite will be held in the near future for inclusion that the Calgary Rural Municipal Hospital District which involves the Holy Cross and Didsbury Municipal Hospital, the Bassano Municipal Hospital and the Didsbury Municipal Hospital.

The district was set up in April 1940 under a provisional board which has now passed into history. Any ratepayer in the district may require \$1 a day hospitalization benefits.

Ratepayers in the district may participate at the \$1 daily rate provided they pay a minimum tax of \$7.50 annually. The rate would then cover the family and domestic help of the ratepayers.

No ratepayers—may also join by paying \$7.50 annually to the district in the case of a family, and \$5 in the case of single persons.

The hospital district would then re-allocate the areas included in the scheme on the basis of a 2.5 mill levy on rural values and a 3.54 mill levy on urban values.

It is estimated this levy would require a total of \$74,567 to which would be added a provincial grant of \$40,467 and \$1,612 from the sale of propane contractor plates.

The propane contractor estimate, should be 22,182 patient days at a total cost of \$116,243 to which would be added administration expenses of \$2,850, leaving a surplus of \$2,266.

In all three new ranges are included, they will join the Municipal Districts of Bow Valley, Crowsnest and Springbank; parts of Mountain View and Slesseberry; parts of Improvement and the towns of Gleichen, Cochrane, Crossfield and Irricana.

It is planned to place the scheme in effect on July 1, provided the ratepayers approve in the forthcoming plebsite.

A gentleman came into a barber shop with a small boy in a barbershop chair. The boy had just had an appointment in the neighborhood which would like his own hair cut first. This accomplished he handed the boy a pair of scissors and said, "When the hair is finished and you're done, the barber man had not returned and the barber sat the child in a chair. A half-hour passed.

"Don't worry," said the barber reassuringly, "I'm sure your father will be back soon."

"My father?" exclaimed the boy.

"Why, he's not my father!" He just came up to me in the street and said 'come along, let's both get a hair cut'."

GARDEN PLANT PROTECTORS FROM WIND AND FROST . . .

In gardens where high winds and late frosts sometimes occur in the spring, plants benefit greatly when protected early in the growing season.

A shelter belt of trees is very valuable. A row of tall evergreens, a row of tall growing trees, and a row of low growing shrub, such as caragans, provides protection at ground level. A row of evergreens, with their dense foliage and excellent mature tree height supplies all year protection.

In the absence of trees, a number of materials can be used for temporary plant shelter. Snow fencing placed around the garden, artificial protection. Dead tree branches or hedge shingles placed next to the plants will reduce wind and sun damage.

Certain kind of tender vegetables respond to protection provided for the individual plants. Tomatoes, peaches, apricots, and some others fall in this category. The use of tin cans with the ends removed and placed over the plants will prevent wind and cutworm damage.

A number of manufactured plant protectors available to the gardener are highly satisfactory. These protectors are made of paper and we sometimes reinforce with wire. The most recent type is made of plastic. All of these are effective in preventing damage to the plants by wind, frost, cutting soil and many kinds of insects. At the Dominion Experimental Station these protectors have been used to advance

the seedling date of melons and the transplanting date of tomatoes as much as two weeks. As a result ripe melons and ripe tomatoes were often eight to ten days earlier and in larger quantities than from plants not protected.

Protectors of ample size allowing good air space around the plants have given more satisfactory results. A square or rectangular, inch square hole is cut in the protector, preferably on the south side, for ventilation. The square of paper should be left attached on one side so that it folds over which can be easily closing frosty nights.

the plant inside the protector reaches that top of the enclosure, usually by June 17 to 21, a hole should be cut or torn for the plant to grow through. The protector is not re-

quired.

Town & District

Mrs. M. Holt and wife returned home from Calgary last week where she has been for some weeks.

R. C. Clifford manager of the Pioneer grain elevator has a crew repairing the annex to the elevator.

Word has been received town Mrs. Harry Carrick is confined to a hospital in Durango, B.C. suffering from a broken arm.

Scout King has been living at Camp on Vassar Creek since last October, is slowly recovering a very bad heart condition. He has been in the hospital for some time and has lost 80 pounds.

Mr. and Mrs. Bahr returned during weekend from a three weeks holiday trip spent in the western states. When they last visited relatives in Los Angeles and San Diego. They also, visited Mexico. Mr. and Mrs. say they had a wonderful trip and thoroughly enjoyed themselves.

Now that our little feathered friend the birds, are back again, would it not be a good idea to overhaul the houses already provided for them and put up these new ones. They are already looking around for a place in which to set up a nest box and hope to attract them.

Students Union Gold Awards were made at the University to four students in recognition of their ability in students functions. Miss Pauline Buttermeyer of Gleichen, president of Wauneta and member of the executive committee of the Students Union, was the highest honor that can be awarded by the Students Union. Miss Buttermeyer has taken part in various activities as Wauneta, I.S.S., the Musical Club and director of Wu Wan.

John Edwin Upton died Tuesday morning at 6 o'clock at 76 years. He had been a resident at Eventide Home for the past 10 years. He was born in Ontario and had lived in Alberta for the past 48 years where he followed his trade as a tailor in Lethbridge. Mr. Upton is survived by his wife, Mrs. Upton. The body was shipped to Pincher Creek for burial Wednesday evening by G. W. Evans.

Federal government authorities appear to have launched a concerted drive in the interests of safe motoring.

This need has long been advocated by the Alberta Motor Association which has called for steps to bring about greater safety and the curbing of speed.

A bill to amend The Vehicle and Highway Traffic Act, was introduced at the recent session of the legislature, makes drivers driving an offence for which they can be fined or imprisoned without warrant, while other penalties also are provided for certain infractions.

Of particular interest is the action of the legislature to require compulsory inspection of all power vehicles in the province of Alberta beginning May 1.

After that date no person will be permitted to drive any motor vehicle that has not been inspected within a 12-month period and has not been certified and given a sticker indicating it is safe to be driven on the roads.

The provincial government also has announced that 36 RCMP constables will be added to the Alberta force for highway patrols duties. This will man a 24-hour patrol service on all main highways.

The Olympic Club formed in Montreal in 1842, was Canada's first club to sponsor outdoor athletics.

Reckless Motor Driving Cause Most Accidents

With the approach of spring and summer the time draws near once again the roads and highways of the country will be thronged with tens of thousands of tourists who will travel the streets of towns and cities jammed with traffic. Soon tourists will be in our midst while weekend trips from our centres of population to our resorts and other vacation spots will engage the attention of the residents of all sections of the country.

Is the result to be the hanging up of a record number of fatalities arising from the numerous accidents? In 1951 to provide another dark spot on our much vaunted civilization as with much recklessness "a automobile driving and resultant deaths as were reported in 1950? Are the major arteries of highway travel provided all over the country to have the tragic outcome of steadily diling to the death toll because people, using such better roads cause and control operation of vehicles?

Recent figures published for one city show a very large increase in the number of car accidents reported in 1950 compared with previous years. It is true that in nearly every city in Canada and the United States.

Remarkable as it may seem, it is considered that the most encouraging aspect of the appalling loss of life in the fact that recklessness is the primary cause of accidents. One driver expresses himself thus in regard to accidents: "If carelessness and over confidence kill him and hurt so many thousands of people, then carelessness and consideration in prevent such losses."

It is to be hoped to prove that the majority of accidents last year occurred on straight and road ways, in road daylight with experienced and attentive drivers at the wheel. In an reprehensible manner, the man was not at fault. He took unjustifiable chances.

In a striking analysis of accident sports a well known insurance company disclosed that the main cause of the high death rate, contrary to common impression, was proved to be inferior drivers than men. Young men t best physical development were the inferior drivers.

Other violations of the laws as well as the rules of the road are a heavy toll.

The higher the single factor of accidents however, was the improper attempt to take the right of way from some other traveller, selfishness, thoughtlessness.

As might be expected, week end driving is most hazardous. Sunday is the worst day by far and Saturday is

There was a time when defective construction of cars, poor brakes, etc., were held responsible for most accidents. Today the fact has been well established that as drivers we are not so much as cars are concerned. We must learn to drive our vehicles safely. The records of the railroads are marvelous. Where safety is the goal, airplanes have achieved miracles in protecting human life. In other words, cars operate too powerfully, fast moving machines if we put our minds to it.

What we have to learn is that safety is more important than speed.

Drivers must be made to realize that they are steering three of four thousand

(Continued on last page)

YOUR COMMERCE BRANCH

Keystone of Main Street

Our town is here to stay. We ship thousands of cattle by rail to all sections of this country. We are an important spot on the rolling prairie.

Canadians depend on towns like ours for a steady beef supply. We depend on services within our own community to keep that supply constant. One of these is your bank—The Commerce.

Yes, our town is here to stay and so is the Commerce branch. The men and women there are good people to know.

WHERE DOES THE MONEY GO?

At times most of us have looked at purse, wallet or bank book, and wondered: "Where does the money go?" You may have wondered, too, where does our money go—the money we receive for gasoline, fuel oil, lubricants and other products we sell. Well, last year each dollar we received went this way:

CRUDE OIL and the other raw materials we bought took half of each dollar.

OPERATING AND ADMINISTRATIVE expenses took more than 25 cents. This was the cost of searching for and producing oil, of manufacturing and marketing the hundreds of products required for thousands of uses. Throughout the year high quality products were made available where and when you needed them.

TRANSPORTATION of products from our refineries to marketing points took the next big bite of the dollar. Products moved over wide areas to serve every community in Canada.

TAXES to provincial and federal governments took 7.64 cents. And this did not include gasoline tax—which depending on where you live—cost from 21 to 33 cents out of every dollar you spent for standard grade gasoline.

TO REPLACE worn out equipment and to make sure we can supply your needs in the future took 3.59 cents.

DIVIDENDS paid to shareholders for use of plants and equipment amounted to 3.45 cents.

IMPERIAL OIL LIMITED

Juvenile Delinquency

IT IS ENCOURAGING to learn that juvenile delinquency, which has been regarded as a serious social problem in Canada during the past ten years, is decreasing steadily. In 1942 an all-time peak was reached in the number of convictions of juveniles for major and minor offenses. In that year, there were 11,758 convictions, but this figure dropped to 7,545 in 1947 and to 7,038 in 1948. While these figures indicate the trend in the number of cases, they do not give a completely accurate picture of the situation since in some instances the same culprits are dealt with several times, each conviction being recorded as a separate case. It is pointed out that a number of cases involving juvenile delinquents never come before the courts, but are dealt with by the police, social agencies, or by the courts on an unofficial basis.

Broken Homes Are Blamed

Cases of juvenile delinquency among both boys and girls are mainly concerned with theft, burglary, receiving stolen goods and wilful damage to property. Statistics show that there are more cases of juvenile delinquency in Ontario and Quebec than in the other provinces, but it is believed that this is due to the fact that there is a larger population in those provinces. In Alberta, where the population is smaller, a large part of the population is located in rural areas, there are fewer cases brought to the courts, and so there are fewer convictions recorded. The rise in juvenile delinquency has been attributed to the fact that many homes were broken during the last war, when fathers went into the armed forces and many cases, mothers worked in industrial plants. Following the war, inadequate housing and crowded living conditions in many communities were blamed for juvenile crime.

It has been shown, however, that in 1949 only about thirty per cent of the cases brought to court involved broken homes. Likewise, ignorance of Canadian laws was shown to be only a small factor contributing to juvenile crime, with 63 per cent of those convicted having both parents born in Canada. Increasing interest on the part of communities in providing recreational facilities, more attention to the family, and the improvement of the relationship between parents and schools are believed to be among the factors contributing to the decline in juvenile delinquency and it is to be hoped that there will be continued success in the efforts made to solve this serious social problem.

Decrease In Cases Noted

Likewise, ignorance of Canadian laws was shown to be only a small factor contributing to juvenile crime, with 63 per cent of those convicted having both parents born in Canada. Increasing interest on the part of communities in providing recreational facilities, more attention to the family, and the improvement of the relationship between parents and schools are believed to be among the factors contributing to the decline in juvenile delinquency and it is to be hoped that there will be continued success in the efforts made to solve this serious social problem.

GARDEN NOTES

Gardeners Advised

To Try A New Variety Of Plant Each Year

Keep Them Coming

There is no reason why the gardener should not have at least one variety of each vegetable and fruit and vegetables are better tasting. For even the coldest parts of Canada, there is a wide variety of early corn, tomatoes, melons and such semi-tender things that will do well. It is also possible to make very early sowings of such things as beans, carrots and lettuce every two weeks up to the first week or so of July.

Be Ready For Tumbleweeds

For flowers, vines, flower, fruit, vegetable and shrub it seems there is a special insect or disease. Few insects can be controlled and many have several enemies. The best defense is healthy growth and good seed. Good composting helps control damage in a clean, well cultivated garden of healthy growth. It is a good idea to know what plants are not doing well and where there are a lot of weeds and other refuse to prevent and help combat bugs and diseases.

For the garden enemy there are dusts and sprays specially prepared to deal with them. For the bugs that eat the leaves, the best way is to spray. For those that suck the juices causing the plant to wither attack with a strong solution of Disease usually takes the plant's cells and causes withering or rot in blackish brown spots. This is the only way used in this case. Often one good treatment will be enough, but with the many different kinds of bugs which lay eggs, two or three successive treatments are required.

Admission will be granted students holding high school diplomas with at least a "B" average in grade 12 subjects. Requirements differ from university and faculties and an average of at least 60 per cent is required.

The number of specific subjects required for matriculation in the fields of foreign languages and mathematics will be reduced by a change in high school curricula.

It should be remembered that the job of the plant breeder is to bring out new and better varieties, turning out better and harder strains. So far, the range of interest and also value.

It should be remembered that the job of the plant breeder is to bring out new and better varieties, turning out better and harder strains. So far, the range of interest and also value.

In addition to brand new flowers and vegetables, new shades have been added to old standbys among the flowers, and earlier, more tender varieties are starting to appear.

Some of the favorite of our father's and grandfather's days would hardly

be recognized today. Flowers have returned to the Delta Marsh for the nesting season, ensuring the success of an experiment undertaken last year by Al Hotham, director of the Delta waterfowl research station and the game and fisheries branch.

During the past two years, eighty geese were hand-reared at the Delta station, banded and released to fly south in the fall.

On the morning of April 4 this year, the first flock of wild geese returned from the south, but only one bird took wing from the pond. Later the same day, however, three separate pairs of banded birds returned to circle the station.

Late in the afternoon, April 8, another flock appeared from the north and at the time all 31 birds had returned to the marsh on which they were reared.

Others may yet come," states G.W. McCalla, director of the game fisheries, department of Mines and Natural resources, "but we suspect that this year after a long lapse of time there will be wild geese raised on the Delta marsh."

Appointed Dean Of Agriculture

EDMONTON—Dr. A.G. McCalla, professor of plant science at the University of Alberta, has been appointed dean of agriculture succeeding Dr. D.B. Sinclair, who died last month.

A native of St. Catharines, Ont., Dr. McCalla graduated from the University of Manitoba in 1928 and received his master's degree in agriculture in 1931. He obtained his Ph.D. from the University of California in 1936.

Last year, Dr. McCalla was appointed to the director of the national research council as scientific representative succeeding Dr. Robert E. Atkinson, former president of the university.

Urge Support For Dairy Farmer

CALGARY.—The gravest problem in Canadian agriculture today was the plight of the dairy farmer. This year, the number of dairymen reported for matriculation in high school will be reduced to two years from three and matriculation courses to three from four.

INDIA'S POPULATION NOW 361,828,000

NEW DELHI.—India's population has jumped 13.4 per cent since 1941 and now totals 361,828,000, provisional census figures indicated. It is the world's second most populous country, exceeded only by China.

Jimli, Manitoba

Business Booming In Resort Town Due To R.C.A.F. Station

Business is booming in Jimli, Lake Winnipeg summer resort town, and the fact can be directly attributed to the \$1,155,000 R.C.A.F. station built there by builder, builder and baker, insurance agents, hotelmen and taxi drivers are hopping with the trend in business so unusual in the vacation resorts off-season. The town banker is overjoyed.

Everyone is happy with the exception of 100 R.C.A.F. families whose wives and their families who claim that accommodation and living conditions are nothing short of "austeres."

The majority of married personnel were forced to live in unheated and unseated summer cottages lacking plumbing and adequate heating facilities. Throughout the winter, it has been hard drinking water.

In addition, married officers report that "bunking up" is the rule. They say cottages were rented last fall at \$25 now range from \$35 to \$50 and more a month.

Major MacLean, commanding officer of the Jimli R.C.A.F. station, personally investigated living conditions of some of his officers. He found the place "indifferent."

"I want to make it clear that the officers and men hold a warm personal regard for the place," he said.

"But lack of adequate accommodation, both on and off the station, is the main trouble," he said. "People are being posted here on any other station in Canada."

About 180 families are living in the Goldring Beach area, but another 100 couples are separated and

"SALADA" TEA BAGS

They're amazing good
Made with Amazing New Fast DRY Yeast!

JELLY BUNS

Measure into small bowl, 1/4 cup water, 1/4 cup sugar, 1/2 cup flour. Dissolve. Sprinkle with 2 cups Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min. THEN stir well.

Cream 1/2 cup shortening; gradually add yeast mixture. Gradually add 1/2 cup milk. Add 1/2 cup lemon extract, 1/2 cup milk which has been heated, 1/2 cup sugar, 1/2 cup flour, 1/2 cup raisins, yeast mixture. Stir in 3 c. flour until smooth. Work in 1 c. sunflower seeds, 1/2 c. sunflower oil, brush top with melted butter or margarine. Place in greased pan, place from draught. Let rise until double in size. Turn out onto floured board and cut into 16 equal portions. Place in greased muffin tins. Fill with melted butter or margarine, roll in 1/2 cup granulated sugar and arrange 12 raisins on top of each bun. Cover and let rise until doubled in bulk. Bake in 375° oven for 15 min. Let cool 15 min. Lower to 350° about 15 min.

• No more disappointments because the yeast has spoiled! Fleischmann's Fast DRY Yeast replaces old-fashioned yeast which is hard to keep fresh and dried strength — right in your cupboard! For fast-rising dough and grain oven results get Fleischmann's Fast DRY Yeast to-day!

OUR COMPLETE SHORT STORY

HALF AND HALF

"Put Up Your Money
And I'll Cover It."
Was Jawn's Policy.

By FLOYD LYNN

EVERY person in the community awaited with interest the coming of Jawn, the Sanit-Bacson, the new baby. Last-minute wagers were still being placed in the safe up at Bob's Cafe, and Jawn was just as confident as ever in winning the bet offered by his neighbors.

The Bascombs already had six boys running around, so he had married around their farm home. But boomerang-voiced Jawn was a man with lots of energy, and there was a bit of holding when Wells, the sixth boy, was born.

"What you tryin' to do, Jawn?" Bob kidded. "Raising a baseball nine?" Jawn was feeling pretty good.

For The Gardener

HOTBEDS, COLD FRAMES—Above are diagrams of two types of hotbeds and a cold frame, structures of great value to the gardener who wants to have it commercially or merely for his own pleasure. Top diagram shows a hotbed which is a heated surface type, and at the bottom is a permanent hotbed with pine. Construction details are available in Publication Number 668, from Information Service, Department of Agriculture, Ottawa.

: Western Briefs :

Pensions Boosted

VICTORIA.—Service pensions for retired school teachers and for those who have served 25 years or more of service under provisions of Teachers' Pensions Act amendments.

Contract Minister W. H. Stratton.

Checking Houses

SASKATOON, Sask.—City engineers say a number of poor-built shacks and houses are being moved to new foundations and will be willing to see good structures made in this fashion but are asking owners to pay for the improvements before moving.

Placed Third

WINNIPEG.—Daphne placed third in 42 Canadian towns and cities last week in a competition for scoring between 80 and 90 per cent in a fire prevention campaign held last October. H. E. Putten, provincial director of fire prevention, said competition is conducted by the National Fire Underwriters and the Canadian Fire Protection Association.

Good Record

VICTORIA, B.C.—Harry Kirby, 37, who lost an arm in a train accident in 1920, has been driving a taxi since November. Now he's covered more than a million miles—and never had an accident.

To Build New Hospital

ELKHORN.—Construction of the new Elk Horn eight bed hospital has begun immediately and work will begin.

Contract for the work has been let to the Webe Construction Co. Ltd., who will start work on completion of the building by November 1. Amount of the contract was not disclosed.

Return Gesture

WINNIPEG.—The Manitoba Red Cross has offered rubber boots and

waders, thermos jugs, blankets, plastic gloves and other supplies to the American Red Cross for use in flood areas.

After the Manitoba floods last year, the American Red Cross donated \$250,000.

Timely Runaway

REGINA.—A team of horses burst from the railway track in a heavy snowstorm recently at Kinsmen, they saved the life of farmer Old McCann, who was in the enclosed freight car. The horses were running on greased braking sheet and centre each with a piece of wood. The horses weighed over 3500, about 15 min. Remove baking soda from the oven. Yield 9 dozen cookies.

To Pay \$2.50
For Pheasant Eggs

If you think her eggs are expensive, try buying them.

Her branch expects to pay more than \$2,500 for 14,000 pheasant eggs which will hatch in April. They will be hatched in incubators in the Brooks area and the young birds will be raised in pens in the prairie.

They will go mostly to the eastern irrigation district, where blizzards delayed the pheasant season by about 35 per cent.

The eggs will cost from 16 to 25 cents each.

Two More Drilling
Ventures Started In B.C.

CALGARY.—Two more drilling ventures have been started in northern British Columbia by Pacific Petroleum, Limited.

The openings represent further expansion of the gas search in the Peace river area.

A total of 12 ventures are now down-drilled in the Peace River. It is the proposed source of supply for Wedgewood's planned gas line to the Pacific coast.

The TILLERS

PRINCE ALBERT, Sask.—Mr. and Mrs. M. B. Fraser were jolted out of their sleep at 6 a.m. From their bed they saw the front end of a truck driving into the adjoining living room.

The car was empty. A few minutes later, Rev. D. N. Erickson, a minister, came running down the hill in front of the Fraser bungalow. Said Mr. Erickson: "I went to town to buy bacon when I noticed the car was gone." The runaway car stayed in the shingles and plaster of the living-room wall and damaged some furniture. Then he went back for breakfast. The next thing I noticed the car was gone."

A POPULAR CANADIAN CUSTOM, from coast to coast, nothing is more friendly or cordial than the "tillies" or "tillers." But here's a word of advice. Keep the food simple and light. For instance, a few cakes or sandwiches make appetizing snacks to accompany afternoon tea—and there's no tea better than Salada.

Tea Growing
In B.C. May
Boost Industry

VICTORIA, B.C.—Tea growing may become an industry in British Columbia employing many hundreds of persons. Trade and Industry Minister Leslie Byres said in the legislature yesterday.

The minister disclosed that a firm at Milner, in the Fraser valley, is growing tea and has installed the first black and green tea plant.

The firm now has 300 bushes and will double that number this year and will produce 100,000 pounds of tea in the current season.

Mr. Byres advised it took three years for a tea bush to bear maturity.

FIRST SEEDING OF
SUGAR BEETS DURING
WEEK OF APRIL 14

TABER, Alta.—First seeding of southern Alberta's 1951 sugar beet crop of 57,000 acres has been made in the Taber area.

Clifford W. Bennett has planted a five-acre plot. First seed last year April 15.

Better weather in the district is expected to become general within the next week.

To Live Right — Eat Right

DR. H. KARL RASMUSSEN

Announcement is made of the appointment through the Civil Service Commission of Dr. H. Karl Rasmussen as Chief, Animal Husbandry Division, Department of Agriculture, Ottawa. He succeeds Dr. W. H. Miller, who has retired at Lethbridge, Alberta, succeeds George W. Smith, who has retired some months ago. As Chief of the Animal Husbandry Division, Dr. Rasmussen will head up all animal husbandry work of the Experimental Farm Service throughout Canada.

UNIVERSITY FEES GO UP
VANCOUVER.—The University of British Columbia, confronted by higher operating costs and a decline in revenue, has announced student fees will be increased by \$50 at the next term.

Cookies—extra tasty when
they're MAGIC baked!

OAT CRUNCHIES

Mesquite into bowl 3½ c. rolled oats and sprinkle with ½ c. sugar. Magic Baking Powder, ½ c. tap, salt, ½ c. granulated sugar, 1 c. flour, 1 c. melted butter, 2 eggs, 1 c. orange juice, 1 c. milk, 1 c. water, 1 c. raisins, 1 c. nuts, 1 c. chocolate chips. Mix all together. Add 1 c. egg mixture to dry ingredients and mix thoroughly. Pour into greased pan. Bake at 350° for 30 min. Remove baking soda from the oven. Yield 9 dozen cookies.

That Little Feet May Walk Safely

Small children seldom realize the dangers they face going to and from school. Be sure YOU do! Drive extra carefully in school zones, whether town or country; keep your eyes and ears open, pay attention to keeping your car under control. Every accident avoided saves pain and tragedy in someone's home. Do your part.

BE SAFE! DON'T HIT A CHILD!

Be Careful - the life you save may be your own!

Largest Canadian-owned oil company has two big subsidiaries in the United States thus reversing the usual practice of U.S. companies having Canadian subsidiaries.

Canadian roads can average more than 35 miles an hour for more than a quarter of a mile.

In one area, Poco, the humidity is so high that matches will not ignite unless lit in sunlight hours.

As recently as two centuries ago, 200 crimes were punishable by death under English law.

Mysterious Bad Lands of Alberta

Rare living creatures of the reptilian age and possibly a new key to the track—a pair of lockets in the black forbidding badlands of southern Alberta. Such extraordinary creatures as scorpions, scorpionflies, centipedes, scorpions, white ants and scorpions (sun spiders) live on the "padding-stone" rock and cravies as their forebears did in the era before the Rockies. Mountain men were amazed.

The badlands, too, are the stamping grounds of rattlesnakes, hog-nosed vipers and deadly black-widow spiders—poison life completely alien to other parts of Canadian prairies.

There is no longer any doubt that these queer species of insects and snakes are native to the region of Alberta and their survival tells a lot about Canada was like long before the dawn of civilization.

An interesting coincidence, the semi-transparent yucca plant, too, finds its place in these strange places, living a life as strange as any of the insects or reptiles about it. Only the yucca moth can fertilize the yucca plant. Two species of the moth have been identified. These moths mate at the time of fertilization, then the larva eat the developed seeds of the yucca plant though plenty remain for perpetuation of the yucca.

It has been known for a long time, of course, that the badlands are a great field for scientific research. Furthermore, they constitute a natural museum.

Next time you are in the vicinity of the Range Station at Manyberries looking over the western prairie for a few hours, take a look at these ancient fauna and flora in their natural habitat.

We had a small spring blizzard last Wednesday and Thursday. The drifting snow did not amount to much but it plugged some roads in town and country.

Last week many thousands of dollars was paid to the Indians. This money was known as lease money received from leases of land to white men. The Indians had the town spent their money freely thus gladening the hearts of the store keepers.

The Salvation Army

Meetings held in the Auditorium of Eventide Home as follows:

Sunday, April 29th, 2:30 p.m.—7:00 p.m.

Major and Mrs. A. F. Parkinson in charge.

Tuesday, May 2nd, 7:30 p.m.—Rev. W. Morrison in charge.

Sunday school every Sunday at 10:30 a.m.

You are welcome.

Reckless Motor

sends pounds of steel in swift momentum, the possible destructive force of which is enormous.

Safety is worth more than anything else. The maiming, and the killing, and the loss of millions of productive years must be stopped. And we, the average drivers, can do it.

When you drive, remember, that a lot of idiots are on the road, and that you may have to project yourself against both fools and road hogs. You must be alert, especially against absent-minded pedestrians and heedless children. In such fashion you will at least have made your contribution to national safety and, incidentally, you will get more pleasure and more use out of your motor car.

The seven seas are the North Atlantic, South Atlantic, North Pacific, South Pacific, Indian, Antarctic, Arctic and Indian Oceans.

Honey bees are sold by the pound.

Yorkshireman W. E. Hopkins is considered champion "world cocktail maker. His "John Simon," for which he used a gin base, won him the title in open competition in London.

Bring or send the news to this column. We always get a good response and we're always happy to receive news. If each one of us sends us news, we could give us an item each week what a grand local paper we would have! Send in anything but politics and we'll publish it.

Dentists who try to stop kiddies eating candies are now faced with the new medical opinion that sugar is not the main cause of tooth decay.

The Call can quote you prices on corner check books that can not be beaten anywhere.

Tomorrow sometimes rises and falls. This accounts for the irregularities of their damage pattern.

A very large man and a smaller one had been lying enough at the bar to reach the confidential stage. "Do you know?" remarked the large one, "I weighed only three and a half pounds when I was born."

"No," said the small man incredulously. "And did you live?" "Did I live? You should see me now!"

Oology is the study of the science of birds' eggs.

Between 1891 and 1909, 2000 French men of noble birth died in duels. Stamp collecting puts a premium on poor printing since a blot, blur or misprint increases the value of a stamp to collectors.
